

OPPOSE EFFORTS TO DELAY AND WEAKEN MENU LABELING

Speed limits aren't useful if they're hidden on the highway. Neither is calorie labeling. If the supermarket, convenience store, and pizza industries get their way, calorie labeling could be posted where people won't see them.

Please oppose any appropriations rider that would delay or weaken menu labeling. The anti-menu labeling bill (S. 261/HR. 772) isn't a "little flexibility", it's denying consumers accessible calorie information in thousands of food service establishments.

For more information, visit menulabeling.org or contact Center for Science in the Public Interest at nutritionpolicy@cspinet.org.
